About Me

I am a career changer – by choice and by design. With a background in creative agencies and over eight years of international project management, I wanted to help shape where the future is happening: in digital products. I planned this transition deliberately and built it up step by step, with the clear goal of contributing to digital experiences that truly work for everyone.

Since then, I have worked in complex environments: B2B platforms at XING, healthcare SaaS as a freelancer, and agency projects for clients such as Porsche, Telekom and Bayer Leaps at Grabarz & Partner. I like to dive deep, ask questions, listen closely and translate insights into designs that work and feel right. I consider accessibility from the very beginning. Collaborating with people with disabilities has fundamentally shaped my understanding of good design, because accessibility is not a box-ticking exercise for me, but a crucial building block.

As a certified AI Manager, I am actively experimenting with tools such as Claude and Cursor and intentionally bringing this perspective into my design and research workflows.

Work Experience

DESIGN x AI: INDEPENDENT PROJECTS & EXPERIMENTS

since 02/2026

- Active job search; developing a personal framework for integrating AI tools into UX research and design workflows.
- Completion of AI Manager certification (Business Academy Ecomex, 2026).

PRODUCT DESIGNER

09/2025 - 01/2026

XING Marketing Solutions - part of New Work SE

Conceptualization and continuous improvement of a complex B2B platform (AdManager) for managing multi-stage campaigns, budgeting and targeting processes for recruiters and advertisers.

- Independent structuring of UX discovery: quantitative user surveys, Jobs-to-be-Done analyses, and consolidation of requirements from Product, Sales and Data into a prioritized feature roadmap.
- Analysis of Adobe Analytics, Quantilope and Mouseflow data; derivation of concrete action recommendations and communication of insights to cross-functional stakeholders (PM, Engineering, Sales).
- Translation of research findings into structured user flows and high-fidelity wireframes in Figma.
- Ownership of the design process from discovery to handoff within a Scrum team; mentoring students throughout the UX process.

UX / UI DESIGNER

06/2023 - 08/2025

Freelance, part-time (so far 2 projects in healthcare and tourism)

Concepting UX solutions for early-stage and growing companies in the healthcare and tourism sectors, with a focus on user-centered methods and accessible design.

- Introducing user-centered UX methods to teams with low UX maturity and establishing lightweight research practices.
- Competitor research, journey mapping and iterative feedback processes.
- Concept and design of accessible digital forms for web and mobile (patient intake, insurance forms) in line with WCAG standards and tailored to complex user groups.

UX / UI DESIGNER

11/2024 - 07/2025

Grabarz & Partner

Improving the user experience for clients such as Porsche, DEVK, Telekom and Bayer Leaps, designing solutions across multiple platforms.

- Contributing to the Porsche design system by developing reusable components for consistent, scalable UI solutions.
- Conducting a WCAG 2.2 audit and acting as an ambassador for digital accessibility.
- Facilitating requirements and concept workshops and creating structured handoff documentation for development.
- Designing the digital campaign for Telekom's "Miniatur Wunderland" AR experience – awarded with Grand Prix, Gold & Silver (Epica), Silver (New York Festivals), a Cannes Lions shortlist and several other international awards.

SENIOR PROJECT MANAGER

11/2016 - 10/2024

Dialogue Social Enterprise GmbH / Dialoghaus Hamburg gGmbH

Most recently Senior Project Manager (at the subsidiary Dialoghaus Hamburg gGmbH since 01/2024 due to internal structural changes; previously Project Manager at Dialogue Social Enterprise GmbH).

Leading international projects to open new "Dialogue in the Dark" exhibitions and developing and delivering workshop, conference and event formats to foster inclusive workplace cultures.

- Owning end-to-end discovery for the digital product line "Dialogue Online for Inclusion": qualitative user interviews, personas, iterative prototype validation; outcome: 5 established workshop formats and a new digital revenue stream.
- Producing qualitative and quantitative research reports for management and funding bodies; introducing systematic impact measurement and data-driven quality assurance.
- Exhibition lead in Trier: managing and coordinating a team of around 20 employees with and without disabilities.
- Managing complex multi-stakeholder projects (GIZ, state authorities, international partners); budget responsibility up to €500,000, including fund drawdown and grant reporting.
- Building and coordinating an international trainer community; facilitating workshops on inclusion, diversity and organizational change.
